

ALI ENERGY (PVT) LTD.

WE DEAL IN ALL KIND OF MEDICAL & INDUSTRIAL GASES
LPG, OXYGEN, NITROGEN, ARGON, MIXTURES & SPECIAL GASES.

OFFICE # M-2, MEZZANINE FLOOR, FORTUNE
ARCADE, BLOCK-2, CLIFTON KARACHI PAKISTAN

About The Company

In 1961 Mr. Zarwali Khan started the Logistics Business and now his sons Mr. Mumtaz Ur Rehman & Tahir Muhammad Khan are looking after the whole business. We are not only providing quality Logistic Services in Pakistan but also we have proven our skills in Middle East.

Founded by the visionary Mumtaz Ur Rehman, Ali Energy has solidified its reputation as a stalwart in the medical and industrial gas industry of Pakistan. Specializing in a wide range of gases, including LPG, oxygen, nitrogen, argon, and various mixtures and special gases.

In 2013 we entered in Industrial & Medical Gases Business and in 2021 [dated: 26-03-2021] we formed a Proper Private Limited Company “M/S ALI ENERGY PRIVATE LIMITED”.

Our Mission

Our mission is to empower Pakistan's medical and industrial sectors with the most reliable and efficient supply of quality gases, sustained fast growth to lead the market in safe, reliable and innovative solutions for industrial and medical gases, products and engineering services

We aspire to meet the diverse needs of our customers while ensuring safety, quality, and timely delivery.

Our Vision

Oxygen For Life & Sustainable Growth.

To be the leading provider of medical and industrial gases in Pakistan, setting the gold standard in quality, safety, and customer satisfaction.

Everyday we touch the lives of millions of people through the products and services we supply to our customers across a wide range of industries from medical gases that sustain lives, to gases used in steel making and in food production and distribution.

The background features a vibrant collage of geometric shapes in blue, red, and yellow. A central word cloud contains terms like 'trust', 'communication', 'teamwork', 'pride', 'excellence', 'confidence', 'commitment', 'leadership', 'integrity', 'quality', 'honesty', 'openness', 'simplicity', 'potential', and 'progress'. A large, faint 'values' watermark is also present. A yellow circle highlights the word 'integrity' in the word cloud, and another yellow circle highlights the word 'community' in the text below.

Our Values

Safety: Prioritizing the well-being of our clients, staff, and community.

Integrity: Conducting our business with honesty, transparency, and respect for all stakeholders.

Innovation: Continually seeking advanced techniques and equipment to ensure top-notch products and services.

Community: Recognizing our responsibilities to the community and making positive contributions to the nation's progress.

Customer Centricity: Placing the needs and satisfaction of our clients at the heart of everything we do.

Our Commitment

our dedication is unwavering. We pledge to consistently support our clients, ensuring their essential gas needs are met efficiently and on time. Whether they are individual patients, medical institutions, or expansive industrial setups, our promise is steadfast: to deliver excellence in every interaction, making a positive impact on the lives and businesses we touch.

Our commitment remains unwavering: to serve with excellence and contribute to a better Pakistan.

Medical Gases:

- **MEDICAL OXYGEN**
- **MEDICAL NITROUS OXIDE**
- **MEDICAL AIR**
- **ENTONOX**

Ali Energy stands at the forefront of medical gas provision in Pakistan, ensuring that healthcare facilities and patients have consistent access to life-saving gases. Our range encompasses Medical Oxygen, a vital component in patient care and surgical procedures; Medical Nitrous Oxide, widely used as an anesthetic and analgesic; Medical Air, crucial for respiratory therapies; and Entonox, a blend of nitrous oxide and oxygen, renowned for its pain-relieving properties during medical procedures. With a steadfast commitment to quality and safety, Ali Energy ensures that these gases adhere to the strictest purity standards, facilitating optimum patient care and enhancing the efficacy of medical treatments.

Industrial Gases:

- **DESSOLVED ACETYLENE**
- **ARGON**
- **NITROGEN**
- **AMMONIA**
- **CARBON DIOXIDE**
- **OXYGEN**

Ali Energy has carved a niche as a trusted supplier of industrial gases, pivotal for various sectors in Pakistan. Our comprehensive suite includes Ammonia, essential in refrigeration and agriculture; Argon, often used in welding and electronics; Dissolved Acetylene, crucial for metal cutting and welding applications; Carbon Dioxide, used across beverage, food, and fire suppression industries; Nitrogen, a key player in preserving food and electronic manufacturing; and Oxygen, imperative for combustion and chemical synthesis. With a commitment to unparalleled quality and delivery consistency, Ali Energy ensures that each gas meets the rigorous industry standards, to helping the business operation efficiently and innovatively.

LPG GAS:

Ali Energy has firmly established itself as a preeminent supplier of LPG (Liquefied Petroleum Gas) in Pakistan. Serving both gas stations and individual consumers, we take pride in delivering a clean and efficient energy solution that meets the daily needs of countless households and businesses. Our commitment to safety, quality, and timely distribution ensures that our clients receive a consistent and reliable LPG supply, reinforcing our reputation as a trusted partner in the energy sector. Whether fueling vehicles at gas stations or powering stoves in homes, Ali Energy's LPG stands as a testament to quality and dependability.

We are the Authorized Distributor of Pakistan State Oil Company. We are constructing LPG Plant at Port Qasim which is under process. We are working in cylinders & Bulk quantity of LPG.

COAL

Coal is a combustible black or brownish-black sedimentary rock, formed as rock strata called coal seams. Coal is mostly carbon with variable amounts of other elements, chiefly hydrogen, sulfur, oxygen, and nitrogen.

Beyond its expertise in gas distribution, Ali Energy also plays a pivotal role in the coal supply chain. Recognizing the multifaceted energy needs of Pakistan, we ensure the provision of high-quality coal to various sectors. With a keen emphasis on sourcing, handling, and delivering coal safely and efficiently, Ali Energy strengthens its position as a holistic energy solutions provider. Our commitment to serving the nation's energy demands further cements our reputation as a versatile and reliable partner in the industry.

Specialty Gases Expertise:

Ali Energy is a trusted partner for diverse sectors, including analytical, pharmaceutical, and petrochemical industries, providing them with specialty gases of unique properties. These gases not only enhance product yields but also optimize performance while curbing process expenses. Beyond our range of specialty gases, we take pride in offering calibration gas mixtures, ultra-high purity gases, and noble gases. These gases find their essential roles in online analyzers, gas chromatography, gas detectors, and NMR spectroscopy, to name a few. Committed to fulfilling the industry's nuanced needs, Ali Energy boasts a state-of-the-art specialty gas production facility in Pakistan, tailor-made to meet each client's unique specifications and requirements.

Process Mixtures:

Gas mixture are either mixed continuously on site from pure gases or supplied pre-mixed. Different types of gas mixture are used in the metal fabrication, food, medical and lightning industries

Calibration Mixtures:

Calibration mixtures are the norm for all measuring equipment and every process and therefore require strict accuracy in mixing ratios and measurements. They are used to correct industrial and research grade analytical equipment and manage process and quality.

Rare Gases:

We supply various rare gases used in medical, lighting, laser, processing and LCD/PDP display. This includes products like Helium, Hydrogen, Neon, Nitrogen, Zero Air and many others.

Ultra-high Purity Gases :

Ultra-high purity gases provide standard data for zero-point corrections in the manufacturing process. They are thus essential in experiments, research, production of semiconductors, petrochemicals and in environmental sector. They are also used as a carrier gas for a variety of analytical equipment and as sealing gases for light bulbs.

Industries We Serve:

A wide range of gases can be transported to users in a number of different ways, for example in cylinders under very high pressure or in special vessels designed to hold cryogenically liquefied gases at extremely low temperatures. The volume of gases purity levels and delivery intervals will vary depending on their utilization.

- **Chemicals**
- **Glass**
- **Welding & Metal Fabrication**
- **Ship Repair & Maintenance**
- **Food & Beverages**
- **Medical**
- **Electronics**
- **Pharmaceutical**
- **HealthCare**
- **Automotive**
- **Oil & Gas**
- **Hospitality**
- **Paper**
- **Constructions & Infrastructure**
- **Laboratories**
- **Metal**
- **Refining**
- **Hygiene**
- **Energy**
- **Aircraft**

High-Quality Gas Cylinders:

We pride ourselves on providing gas cylinders that undergo rigorous processing with first-class equipment and advanced processes. Our high-pressure steel seamless gas cylinders come in various specifications and are perfectly suited for a myriad of applications, ranging from hospitals and first aid stations to battlefield rescue and personal health care.
